

Accelerated Oracle Discoverer Migration

Achieve self-service reporting in 10 weeks or less

Automated & Accelerated Oracle Discoverer Migration

Since its 1998 inception, Oracle Discoverer has been the BI reporting tool of choice for many, but has been de-supported since July 2017. As we lift and shift to a new standard it's imperative to not only select the right replacement, but the most efficient way to migrate your existing reports. ennVee has developed an accelerator that automates the migration process, which reduces the total cost and time required to migrate off Discoverer by 50%.

ennVee's migration accelerator helps companies extend their lucrative Discoverer investments by automatically migrating all reports, workbooks, and objects onto leading reporting platforms. The process is automated entirely to ensure rapid, error-free migration with zero report rebuild required.

Key Features

- Automated "as-is" migration to the reporting platform of your choice
- Free assessment and Proof-of-Concept (POC) to identify all Discoverer reports and generate a migration road map
- Workbook consolidation
- Report sun setting
- Transfer all security, user, and report owner information
- Provides a fully-integrated report migration environment
- Extract complete information and prepare specific data sets
- Ensure data is always up-to-date after migration
- SharePoint integration

Business Benefits

- Reduce migration time by 50% and replace Discoverer in 2-10 weeks
- Get it right the first time by minimizing disruptions and re-work before, during, and after migration
- Cost Savings: All engagements are fixed bid based on the number and complexity of reports
- ROI - Secure the longevity of your Discoverer reports

Supported Platforms

- Power BI
- Tableau
- Qlikview
- OBIEE
- SQL Server (SSRS)

Migrated Objects

- Reports
- Infrastructure
- Folders
- Calculations
- Filters
- Conditions
- Joins
- Classes
- Hierarchies
- Business Rules
- Workbooks
- Sheets
- Security
- Roles

Value Added Services

- Impact Analysis
- Post Migration Support
- Future Enhancements
- New Improvements
- Best Practices
- New Functionalities
- Latest Capabilities
- End User Training
