

OBIEE Implementation

Client

- Industry: University-affiliated Scientific Research and Development Firm
- Location: Maryland
- \$8 billion (USD) annual revenue
- 40,000 employees

Scope

- Oracle Business Intelligence (OBIEE) Implementation

Our Approach for Success

ennVee's Business Applications team assists clients in achieving maximum business benefit in Oracle's E-Business Suite applications by providing:

- **Business Knowledge:** We speak your language and understand your business, allowing us to translate technology into meaningful solutions
- **Accelerated Benefits Realization:** Our pragmatic approach to delivery focuses on aligning and prioritizing our services to your organizational goals and objectives allowing you to accelerate your return on investment
- **Risk Mitigation:** Our experienced consultants and our comprehensive approach to risk management form a basis for success

Business Scenario

The goal of the project was to implement OBIEE 10g Full Analytics Suite "Out-of-Box" to 1k+ users. Additionally, the client's business requirements needed:

- Financials dashboards with a "drill-thru" to transactional source system details
- Custom sourcing of project contract data from another data warehouse and alignment with "out-of-box" financial analytics

Solution Approach

We kicked off the project by performing an assessment of the unsuccessful implementation attempts that were handled by two prior implementation partners. After uncovering various gaps, the ennVee team clarified and identified the necessary scope requirements and aligned the BI development team with the client's key business users. The project methodology was further revised to a phased, value-driven delivery approach.

Business Benefits

We successfully completed the implementation on-time and under budget. Our ROI-focused analytics solution satisfied the customer's expectations and provided a process that would enable the client to grow and succeed without needing to contract outside consultants.
