

OBIEE Implementation

Client

- Industry: Supply Chain and Logistics

Scope

- Oracle Business Intelligence (OBIEE) Implementation

Our Approach for Success

ennVee's Business Applications team assists clients in achieving maximum business benefit in Oracle's E-Business Suite applications by providing:

- **Business Knowledge:** We speak your language and understand your business, allowing us to translate technology into meaningful solutions
- **Accelerated Benefits Realization:** Our pragmatic approach to delivery focuses on aligning and prioritizing our services to your organizational goals and objectives allowing you to accelerate your return on investment
- **Risk Mitigation:** Our experienced consultants and our comprehensive approach to risk management form a basis for success

Business Scenario

The client is a leader in the field of supply chain logistics and engages customers across the world. ennVee was brought in to re-implement the "Out-of-Box" OBIEE 10g Full Analytics Suite to more than 5,000 of the client's users. The solution would need to enable custom sourcing of Oracle DRM to support multiple heirarchy drill-downs in Business Intelligence Applications' key dashboards. Additionally, the client wanted to enable labor versus revenue scorecards by custom sourcing labor data from disparate systems.

Solution Approach

The ennVee team performed an implementation assessment for the failing project with the client's prior implementation partner. This enabled the team to determine what was done incorrectly, and to clarify and identify new scope components.

Business Benefits

We assumed project oversight with a revised delivery approach and methodology, allowing the implementation to be executed successfully. Upon completion, the ennVee team re-staffed and educated the client to mitigate any future need for hiring outside consultants.
