

OBIEE Implementation

Client

- Student Transportation Services
- Location: Warrenville, IL

Scope

- Oracle Business Intelligence (OBIEE) Implementation and subsequent upgrade

Project Overview

The client provides comprehensive school bus and charter transportation services to customers across North America. As transport operations expanded, there was a pervasive need to obtain a system that would enable greater analytical processing of vehicle data. Based on ennVee's business intelligence track record in the Oracle EBS space, we were selected to complete the initial OBIEE 10g implementation, and the subsequent upgrade to 11g with the Full Analytics Suite "Out-of-Box" to more than 500 users.

Solution

Our Business Intelligence team successfully configured all OBIEE components and developed and implemented custom DFF extract. Additionally, problem ETL's underwent performance tuning, which enabled us to complete the Fit-Gap Analysis for the client's 90+ existing reports in their human resources operation.

Business Benefits

Including infrastructure, the Financial and HR Analytics implementation was completed in eight weeks. Custom Analytics for Route Performance was also delivered in eight weeks and included 10 Dimensions, 2 facts, 15 detailed analysis reports, 5 Dashboards with drill-down capabilities, and 5 core KPI's.
