

OBIEE Implementation

THE CLIENT

- Transportation Services

PROJECT

- Oracle Business Intelligence (OBIEE) Implementation

Business Scenario

The client is a global provider of school and charter transportation services, and a significant portion of its services cater to customers across North America. As its transport operations grew, there was a pertinent need for a system that enabled greater analytical processing of vehicle data. Based on its Business Intelligence track record, the client turned to ennVee to completed the initial implementation of OBIEE 10g, and to subsequently upgrade to 11g with the Full Analytics Suite “Out-of-Box” to more than 500 users.

Solution

The ennVee BI team successfully configured all OBIEE components and developed and implemented custom DFF extract. Additionally, problem ETL’s underwent performance tuning, which enabled us to complete the Fit-Gap Analysis for the client’s 90+ existing reports in their human resources operation.

Outcome

The Financial and HR Analytics implementation was completed in eight weeks, and included infrastructure. Custom Analytics for Route Performance was also delivered in eight weeks and included, 10 Dimensions, 2 facts, 15 detailed analysis reports, 5 Dashboards with drill-down capabilities, and 5 core KPI’s.

Our approach for success

ennVee’s Business Applications team assists clients in achieving maximum business benefit in Oracle’s E-Business Suite applications by providing:
