

# SharePoint Migration

## THE CLIENT

- High Technology - Digital Printing

## PROJECT

- Oracle Portal to Microsoft SharePoint Migration

## Business Scenario

The business group needed to access one portal to access all the contents located at various network servers. They were using Oracle Portal and facing limitations like:

- Cumbersome Portal access for both customers and employees
- Extravagant Oracle licensing costs for remote login
- Excessive amount of time and effort would be required to implement any changes or enhancements
- Low user adaption due to lack of flexibility in the current software

## Solution

SharePoint was implemented in place of Oracle Portal and all existing content was migrated:

- Software training
- Execution processes
- Various products and services
- Relevant new technology services
- All software download process
- Patch management process
- Release management notes
- Client/employee login management processes
- New product broadcasting
- Product catalog and reports

The ennVee team also added all customer install base and warranty information, management of phone support, and schedules to newer content management systems.

## Outcome

The migration improved usability and ease of maintenance with IT help. In terms of time and effort, the cost of any enhancements or release of new versions is significantly less in SharePoint. Management of SharePoint is now also handled by the sales and marketing business group. Overall, the total cost of ownership is significantly lower compared to other software.

## Our approach for success

ennVee's Business Applications team assists clients in achieving maximum business benefit in ERP by providing:

- Business Knowledge - We speak your language and understand your business, allowing us to translate technology into meaningful solutions
- Accelerated Benefits Realization - Our pragmatic approach to delivery focuses on aligning and prioritizing our services to your organizational goals and objectives allowing you to accelerate your return on investment
- Risk Mitigation - Our experienced consultants and our comprehensive approach to risk management form a basis for success
