

Oracle SOA, Identity & Access Management Middleware Consulting Services & Integration Solutions

Organizations can optimize productivity by extending current and creating new business processes. ennVee's Oracle SOA-based solutions help organizations do more with less by cost-effectively extending business processes, and delivering predictability, responsiveness, and agility.

Using Oracle Fusion, ennVee helps organizations align enterprise IT architecture to business objectives to create optimal, agile business processes, and maximize your investment in Oracle to pursue or refine your existing Fusion architecture.

Expert Middleware Consulting Services

Backed by nearly two decades of experience in the design, development and implementation of Oracle SOA Suite, ennVee utilizes both hands-on experience and industry best practices to help organizations assess a SOA solution, whether already implemented or still in the planning phases. Additionally, we offer flexible delivery models (from on-shore to off-shore, and hybrid) to help organizations complete integration projects on-time and within budget.

Identity & Access Management

Anomaly detection transaction security that delivers innovative, end-to-end:

- Authentication and SSO services for fine-grained application protection
- Federation
- Fraud Prevention
- Authorization and Entitlements
- Web Services Security
- Secure Token Services
