

Oracle Engineered Systems Exadata Managed Services

Level the High Availability Playing Field

Demystify the Complexity of Next-Gen IT Infrastructure

ennVee engineered systems experts help your organization implement and migrate vital business applications, infrastructure, and technologies to an engineered system. We also provide weekend and off-hours support beyond implementation. ennVee's engineered systems offering is backed by a commitment to ensuring that minimal risk is encountered. This is accomplished by aligning to best practices for the entire process.

Bring your ES Strategy to Life

Our ES services delivers mission-critical services across the layers of adoption, deployment, maintenance, and management of your Oracle Engineered Systems. Understanding the challenges of scaling to accommodate data-intensive solutions, we leverage the capabilities of Oracle's Database Machines and Appliances to cut costs, increase performance, and simplify IT.

Whether you are preparing for an Exadata implementation or migration, creating a Disaster Recovery Plan, or need assistance in selecting the right engineered system, ennVee can help. Our implementation and technical expertise enables faster transformation and optimal ROI.

Key Differentiators

- All client engagements include access and use of our proprietary "TrendZ" ES (Exadata) performance monitoring solution to create a holistic representation of Exadata health, enable complex drill-downs, visualize historic data trends, generate month-end reports, and drive capacity planning.
- Track Record: we are recognized for our infrastructure managed services engagements that satisfy and support both IT and business specific requirements.
- No "one size fits all" delivery model: be it on-shore, off-shore, or a blend of both, we align to your needs to ensure reliable global coverage and agile delivery.
- Global ES practice: ennVee is backed by almost three decades of experience providing database and infrastructure development, implementation, performance tuning, and support for organizations of all sizes.

OUR OFFERING

- Oracle Exadata
 - Configuration On-boarding
 - Facilitating Deployment
 - Security Configuration
 - Managed Services
 - On-Demand Support
 - Database or Systems Migration
- Cloud Deployments
 - Network Security Assessments
 - Implementation Best Practices
 - Recommendations
- Network and Security Reviews (New Deployment)
- 24x7 Intrusion Monitoring Help Desk
- Customer and End User training
- TrendZ Infrastructure monitoring Command Center

TECHNOLOGIES

- Oracle Big Data Appliance
- Oracle Analytics In-Memory Machine
- Oracle Exalogic Elastic Cloud
- Oracle Exadata Database Machine
- Oracle Database Appliance
