Oracle Supply Chain Management (SCM)
Consulting Services

Overview

From Fortune 500 to SMWBE, size does not dictate the importance of improving operation performance, while maintaining a competitive advantage in price and service. Having a supply chain that integrates seamlessly with front and back office operations is imperative, and is a factor that can make or break your profitability. We help you leverage Oracle's Supply Chain technologies to lay the groundwork for long term growth and stability.

Our Offering

We understand the pressures placed on organizations today to remain competitive in a global marketplace, and can help you leverage your Oracle E-Business Suite investment to support your supply chain initiatives. Our flexible implementation options include dedicated project management, consistent application of proven implementation methodologies, organizational change management, and user training across our range of business and technology services.

- Increase planning accuracy and visibility to actual client demand
- S&OP – gain alignment of supply, inventories, planning and execution with changing demand
- Manage seasonality, new product introduction and total product life cycle management
