

# TrendZ

## Proactive performance monitoring for Applications, Database, Middleware, and Infrastructure

TrendZ simplifies performance monitoring by historically trending and displaying all business-critical KPIs through a single pane of glass so you can seamlessly identify and resolve issues before they impact your business.

### What you can monitor

	OUT OF BOX	WITH CUSTOMIZATION
Applications	Oracle E-Business Suite	Demantra Oracle VCP Oracle Transportation Management Agile PLM Siebel
Middleware	Oracle SOA OBIEE Oracle OAM   OID   SSO	Hyperion Essbase
Database	Oracle Database	Microsoft SQL Server MySQL
Infrastructure		Oracle Exadata Oracle IaaS Cloud

### Standard Dashboards & KPIs

Database	New Users Logged In, Concurrent Requests, IO, Forms, Forms Connections, Daily User Activity, Sessions, BI Publisher Reports, Wait Events, DB Process, DB Profile.
OS	Close Waits, Disk Space, CPU, Memory, TCP Sockets, Load Average, Applcsf Overhead, IO Reads/Writes, NFS, VM, Disk Space, Mount Point, Connection Health.
Historic	Concurrent Requests, CPU Utilization, DB Segment Growth, User Activity, Archive Log Generation.
Logs	Apache, OAM, WebLogic, Alert, HTTP.
Month-End Reports	Month-End, Period, Year-End, and Business Close, Concurrent Requests, Timing for Key Reports, Pending Work Orders, Monthly Shipment Processes, Invoice Gen, Lock Box, Enhancements, Alerts, Order Cycles, Workflow Activities.

### KEY BENEFITS

#### Everything you need to know in one graph

Define, track, and trend business-critical KPIs from a centralized dashboard to simplify the issue troubleshooting process.

#### Spot issues before they impact the business

TrendZ helps support teams perform more effectively by accelerating issue response time, meeting internal business SLAs, and reducing the frequency of escalated incidents.

#### Management-level Analytics & Dashboarding

TrendZ makes data more accessible to stakeholders, and provides objective measurements for KPIs and internal processes.

#### Reduce manual effort by 50%

TrendZ provides an automated log parser, dashboarding, and drill-down tools to help IT teams become more efficient by streamlining time-intensive maintenance and issue troubleshooting tasks.

Monitor and trend Concurrency, User Activity, Archlog and Database Growth

Easily identify and tune poor-performing programs with holistic, month-end reporting

Drill down by user, business unit, location, or module to measure adoption and optimize licensing for various responsibilities

Track requests running, completed, and failed in each queue across any period of time

**Oracle SOA**  
Monitor the performance of Oracle SOA and composite applications for real-time insights for business performance

**OS Stats**  
Predict hardware failures, monitor connection health, disk space, mount point, NFS, and VM performance

**SSO | Identity & Access Management**  
Measure the user experience, active users, and more

**OBIEE**  
Reduce BI operational costs with proactive monitoring for OBIEE

**ennVee** | Delivering Tomorrow's Solutions Today

ennVee is a global professional services firm that provides Oracle application management, business, and technology consulting services to organizations around the world. Through automation-based application delivery, we help businesses accelerate project completion, reduce disruption, get it right the first time, and reduce the cost to deliver tomorrow's solutions today. Visit [www.ennvee.com](http://www.ennvee.com) to learn more or contact us at (888) 848-6059.
