

Accelerated Oracle Discoverer Migration

Achieve self-service reporting in 10 weeks or less

Automated, Accelerated Discoverer Migration

Since its 1998 inception, Oracle Discoverer has been the BI and operational reporting tool of choice for many, but has been de-supported since July 2017. As we lift and shift to a new standard it's imperative to not only select the right replacement, but the most effective and secure way to migrate and extend your Discoverer business history.

ennVee's Discoverer Migration Accelerator automates the entire process to reduce total cost and timeline by 50%. Our team handles the process to minimize disruptions and ensure rapid, and secure migration of all Discoverer elements to various BI and operational reporting tools.

Key Features

- Automated "AS-IS" Discoverer migration
- Workbook consolidation
- Report sun setting
- Migrate all security, user, and report owner information
- Utilize a fully-integrated report migration environment
- Extract complete information and prepare specific data sets
- Ensure data is always up-to-date after migration
- Integration with business collaboration tools (SharePoint, Oracle Portal, Web Portal)
- Free assessment and Proof-of-Concept (POC) to identify all Discoverer reports and generate a migration road map

Business Benefits

- Reduce migration time by 50% and replace Discoverer in 2-10 weeks
- Get it right the first time by minimizing disruptions and re-work before, during, and after migration
- Cost Savings: All engagements are fixed bid based on the number and complexity of reports
- Migrate securely without losing any Discoverer data or rebuilding reports
- Zero loss of business continuity on reporting

Supported Platforms

- Power BI
- Tableau
- Qlikview
- OBIEE
- SQL Server (SSRS)

Migrated Objects

- Reports
- Infrastructure
- Folders
- Calculations
- Filters
- Conditions
- Joins
- Classes
- Hierarchies
- Business Rules
- Workbooks
- Sheets
- Security
- Roles

Value Added Services

- Impact Analysis
- Post Migration Support
- Future Enhancements
- New Improvements
- Best Practices
- New Functionalities
- Latest Capabilities
- End User Training
