

ennVee ennABLE for Oracle E-Business Suite R12.2 Upgrade Automation

93% of companies using Oracle E-Business Suite are leveraging some form of customization, the scope of which can range from simple changes to seeded Oracle functionality to complex integrations to other systems. Upgrading to EBS R12.2 requires manual remediation of all custom objects, and the management and execution of this remediation process is the key to an efficient and successful upgrade.

KEY FEATURES

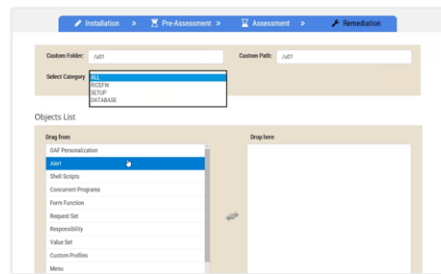

- Automatically remediates 80% of all custom objects for compliance with R12.2
- Automated assessment including organization and tracking of all customizations
- Identify missing/suspect objects
- Pick and choose what to remediate
- Assign or retire custom objects
- Integrity Check (internal control process)
- To-be objects validation process
- Increased effectiveness of technical teams

KEY BENEFITS

- 80% reduction in manual effort
- 30% reduction in preparatory tasks
- 70% reduction in downtime
- 55% reduction in development time, cost, and complexity
- 30% reduction in overall upgrade timeline
- Mitigate risks associated with manual remediation and migration
- Improved agility during cutover including less outages and a reduction of 4-5 hours in overall cutover time
- Reduced consulting spend with automation
- Reduced re-work during SIT

ennABLE Upgrade Automation

ennVee's proprietary ennABLE tool is the first true upgrade tool that automatically remediates and migrates 80% of all Oracle EBS customizations to R12.2. From start to finish, ennABLE will identify all customizations, generate a compliance report, extract, and categorize all impacted custom objects by type and complexity.

Remediation

The screenshot shows the 'ENNABLE-Assessment Summary' table. It has columns for 'Object Type', 'Simple', 'Medium', 'Complex', and 'Grand Total'. The table lists various object types and their counts across these complexity levels.

Object Type	Simple	Medium	Complex	Grand Total
OAF Personalization	0	2055	0	2055
Form Personalization	0	218	0	218
Alert	73	148	73	291
Component Programs	25	0	0	25
Form Function	6	0	0	6
Request Set	1	0	0	1
Responsibility	20	0	0	20
Value Set	28	0	0	28
Menu	6	17	0	23
Custom Profiles	7	0	0	7
Menu	1	0	0	1
Package	107	0	0	107
Package Body	0	18	0	18

Assessment summary of all custom objects

Each object is automatically remediated to comply with R12.2, and migrated to the target R12.2 instance via a mass migration script. ennABLE also provides a MD.120 document with instructions on how to run the script and complete the cutover post-migration.

Custom object types remediated

Database Objects	Setup Objects	RICEFW Objects

R12.2 Upgrade Automation Process

R12.2 Upgrade Assessment

ennVee's fixed-bid upgrade assessment will help you understand how your specific level of customization will impact your upgrade, and allow you to build a better project plan. The assessment generates a detailed summary of all impacted custom objects arranged by object type and complexity, and also provides details of each identified object, and a breakdown for the amount of hours of manual effort required for remediation.

Key Deliverables include:

- Upgrade road map
- Complete list of all customizations, complexity, and upgrade impact
- Compliance Report (Impact Assessment)
- Remediation Estimate (resources, effort, timeline)
- Inferences and Recommendations Report
- Upgrade proposal with timelines and pricing
