

ennABLE Oracle E-Business Suite R12.2 Upgrade Automation

KEY FEATURES

- Automatically remediates 80% of all custom objects for compliance with R12.2
- Automated assessment including organization and tracking of all customizations
- Identify missing/suspect objects
- Pick and choose what to remediate
- Assign or retire custom objects
- Integrity Check (internal control process)
- To-be objects validation process
- Increased effectiveness of technical teams

KEY BENEFITS

- 80% reduction in manual effort
- 30% reduction in preparatory tasks
- 70% reduction in downtime
- 55% reduction in development time, cost, and complexity
- 30% reduction in overall upgrade timeline
- Mitigate risks associated with manual remediation and migration
- Increased agility during cutover including less outages and a reduction of 4-5 hours in overall cutover time
- Reduced consulting spend with automation
- Reduced re-work during SIT

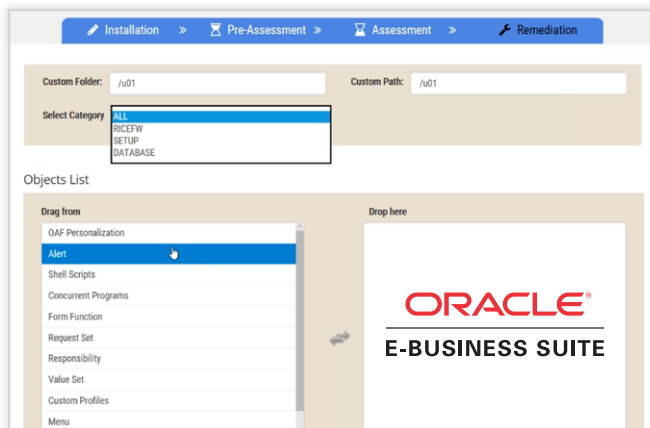

ennABLE Upgrade Automation

Upgrading to EBS R12.2 requires manual remediation of all custom objects, and the management and execution of this remediation process is the key to an efficient and successful upgrade.

ennVee's proprietary ennABLE tool is the first true upgrade solution that automatically remediates and migrates 80% of all Oracle EBS customizations to R12.2. From start to finish, ennABLE will identify all customizations, generate a compliance report, extract, and categorize all impacted custom objects by type and complexity.

Each custom object is automatically remediated to comply with R12.2, and migrated to the target R12.2 instance via a mass migration script. ennABLE also provides a MD.120 document with instructions on how to run the script and complete the cutover post-migration.

Object Type	Simple	Medium	Complex	Grand Total
OAF Personalization	0	2955	0	2955
Form Personalization	0	218	0	218
Alert	73	145	73	291
Concurrent Programs	35	0	0	35
Form Function	6	0	0	6
Request Set	1	0	0	1
Responsibility	20	0	0	20
Value Set	33	0	0	33
Users	0	17	0	17
Custom Profiles	7	0	0	7
Menu	1	0	0	1
Package	107	0	0	107
Package Body	0	98	0	98
View	0	5	0	5

Custom object types remediated

Database	Setup	RICEFW (CEMLI)
<ul style="list-style-type: none"> • Custom Tables • Custom Sequences • Synonyms • Triggers • Functions • Indexes • Materialized Views • Packages • Package Body • Procedures • Views 	<ul style="list-style-type: none"> • Concurrent Programs • Custom Profiles • Form Function • Look Up • Menu • Request Groups • Request Set • Responsibility • Users • Value Sets 	<ul style="list-style-type: none"> • Reports • Forms • SQL Scripts • Shell Scripts • Alerts • Control Files • Forms Personalization • OAF Personalization • Workflows • Custom.PLL

TEST AUTOMATION TOOLKIT

- One-time parameter capture
- Built-in Compliance Check
- Identify everything or a single Schema or Custom Top
- Automated testing for Technical Objects
- Inbound/Outbound Connectivity Testing
- Validate compliance of any new customizations introduced in R12.2

RELATED SERVICES

- Technical and Functional Oracle Consultants

- Discoverer Migration Automation

R12.2 Upgrade Automation Process

ASSESSMENT

Inventory all customizations
Compliance Report
Extract impacted custom objects

SEGREGATION

Categorize by Complexity & Type (Database, Setup, RICEFW)

REMEDIATION

Automatically fix all custom code, and generate a MD.120 and Mass Migration Script

MIGRATION

Execute Mass Migration Script to automatically migrate all remediated objects to R12.2.x

R12.2 Upgrade Assessment

ennVee's fixed-bid upgrade assessment will help you understand how your specific level of customization will impact your upgrade, and allow you to build a better project plan. The assessment generates a detailed summary of all impacted custom objects arranged by object type and complexity, and also provides details of each identified object, and a breakdown for the amount of hours of manual effort required for remediation.

Key Deliverables include:

- Upgrade road map
- Complete list of all customizations, complexity, and upgrade impact
- Compliance Report (Impact Assessment)
- Remediation Estimate (resources, effort, timeline)
- Inferences and Recommendations Report
- Upgrade proposal with timelines and pricing
