

Delivering Tomorrow's Solutions Today

ennVee is a 15-year professional services firm that provides accelerated ERP application management services and integrative solutions to customers across all major industries. Our integrative solutions help customers accelerate digital transformation by reducing the time and cost to deliver, and getting it right the first time.

Since 2003, our global team of technology black belts has grown consistently to include more than 200 full-time employees. ennVee's corporate headquarters is based out of Naperville, Illinois (40 miles west of Chicago), with four development centers throughout India.

Automation-Focused

Over the last five years, we have developed an array of automation tools, "accelerators", that we apply to our process and projects. Through automation, we are able to accelerate solution delivery, shorten project timelines, get it right the first time, and reduce total cost without compromising quality.

- Leveraging automation to provide cost-effective, less-intrusive, customer-centric solutions.
- Leveraging economies of scale to deliver blue chip, practical ERP managed services.
- Risk sharing and rewards to ensure delivery excellence.
- An architectural approach that enables customers to reap the most rewards at minimal risk.
- Accelerated time-to-delivery by leveraging a global pool of technology black belts, best practices, methodologies, and automation tools.
- Accelerating time-to-solution and rapid achievement of profit goals.
- Global availability to support and deliver across all time zones.

Executive Leadership

- Built and lead by former "Big 4" with 25+ years of consulting industry experience with Whittman-Hart, marchFIRST, and Oracle.

Global Team

- Robust global consulting teams capable of delivering from on-site, off-shore, or dual-shore.
- A simplified, architecturally correct model that accelerates customer transformation and enduring value creation over time.
- Decades of consulting experience providing application and infrastructure managed services across all major industries from start-ups to divisions of Global 3000.
