Microsoft Power BI

Intuitive Information Analysis Tool

Finding cost-effective analytics is a challenge. We can help.

Using open source technologies and leveraging existing pre-invested business platforms, we provide a unique information analytics tool to Managers and Executives for retrieving, analyzing and reporting accurate business information.

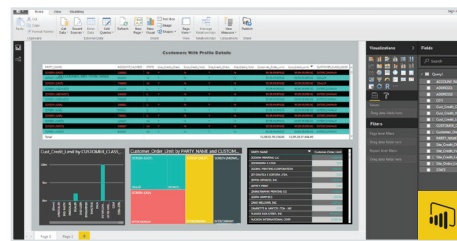

Our Services

As a Business Executive, you are always anxious to know how your business is performing – is your sales forecast met? Is the inventory effectively utilized? Are products shipped on time? Are we buying at lower costs? Are our customers placing repeat orders?

The answer to these questions is to access the right information at the right time, in the right form. Our Intelligent Reporting solution helps you mine the voluminous data churned by your various transactional systems – ERP, legacy systems, spreadsheets and others.

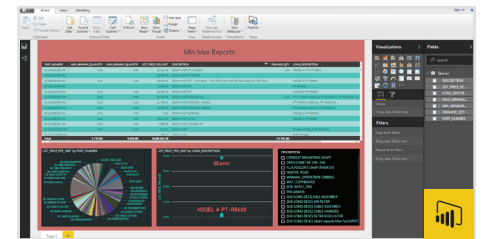

INFORMATION AT YOUR FINGERTIPS

Information overload is one of the greatest challenges to individuals and organizations today. It affects productivity and therefore significantly impacts corporate costs. The solution requires intuitively finding, integrating and utilizing business-critical information through effective information analysis and reporting tools.

Oracle Discoverer to Power BI

Looking to migrate from Oracle Discoverer? We have developed a migration utility that transfers all Discoverer reports to Power BI without requiring a rebuild of any reports. The tool has helped customers maximize their investments in Discoverer and transfer to a more modern and supported reporting tool like Power BI.

Core Offering

POWER BI EXPERTISE

- Migration from Oracle Discoverer
