

Microsoft Power BI

Solutions for intuitive information analysis

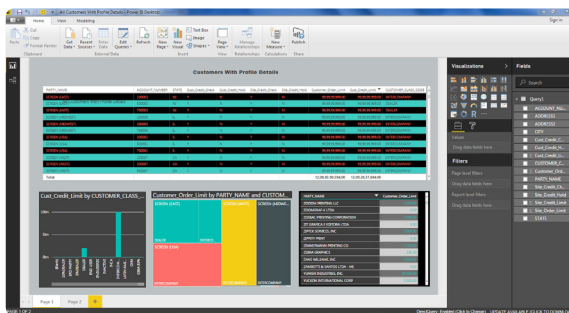

Self-Service, Cost-Effective Business Analytics

Using open source technologies and leveraging existing pre-invested business platforms, we provide a unique information analytics tool to Managers and Executives for retrieving, analyzing and reporting accurate business information.

Our Offering

As a Business Executive, you are always anxious to know how your business is performing – is your sales forecast met? Is the inventory effectively utilized? Are products shipped on time? Are we buying at lower costs? Are our customers placing repeat orders? The answer to these questions is to access the right information at the right time, in the right form. Our Intelligent Reporting solution helps you mine the voluminous data churned by your various transactional systems – ERP, legacy systems, spreadsheets and others.

Self-service access to critical information

Information overload is one of the greatest challenges to individuals and organizations today. It affects productivity and therefore significantly impacts corporate costs. The solution requires intuitively finding, integrating and utilizing business-critical information through effective information analysis and reporting tools.
