ERP Experts Since 1990

ennVee's Enterprise Resource Planning (ERP) background encompasses over 30 years of enterprise-wide implementations and roll-outs beginning with Oracle E-Business Suite. 2017 and beyond- NetSuite is a critical component of our strategic company direction. Our NetSuite-certified consultants help businesses extend and integrate with other mission-critical applications, while ensuring that companies are prepared to pursue further growth in the Cloud.

ennVee's NetSuite Application practice was founded in 2016, though our ERP experience spans nearly 25 years across systems like Oracle, Microsoft, and SAP. Our commitment to providing timely and versatile application managed services still remains the catalyst that fuels our worldwide team of over 200 technology professionals.

Our global software engineering team is trained, tested, and certified across NetSuite's application portfolio. Our ERP expertise enables us to translate business requirements into logical, component-based technical designs, and build customized solutions in NetSuite and associated systems that support business requirements and processes. This, combined with our mastery of the Suitecloud Technology toolkit, ensures optimal customization, business process automation, and data integration solutions for our customers.

NetSuite Admin Solutions

Concise administration and user management is crucial and ensures that users are assigned the proper access to sensitive information and applications. We have built a strong data security and identity management practice around Oracle Access Management and E-Business Suite, and have extended these best practices for NetSuite application setups, configurations, and maintenance.

- User Creation and Management
- Custom Roles Creation and Modification to enforce security
- Application Setup
- Data Import and Data Integrity Assurance
- NetSuite Expansion via SuiteCloud
- Advisory Services for Data and System Protection
- Functional and Technical Resources and Assistance for New Releases
- Dashboard Development and Reporting
- Financial Management

Advisory

- Cloud Road Mapping
- Organization Change Management
- Health Check Assessments
- Quality Assurance
- Optimization & Continuous Improvement

Applications

- Implementation
- Support
- Optimization
- Re-Engineering
- Migration

Implementation

- Rapid deployment of global resources
- New Modules
- Migration to NetSuite
- Post-Migration support

Integration

- "Get it right the first time"
- NetSuite to/from Oracle E-Business Suite
- NetSuite to/from Oracle Fusion
- NetSuite to/from Tableau
- Oracle Discoverer to SuiteAnalytics

NetSuite Consulting

ennVee NetSuite consulting services augment your existing in-house skills and enable you to expand both knowledge base, and the necessary level of expertise based on budget, requirements, or future roadmap.

Our consulting services are fully-customizable and versatile — from full-scale implementation, to planning and deployment, customization, managed support, custom development, and integration with internal Oracle systems or Third Party applications.

Clients choose ennVee when they need to manage skills gaps and fluctuating skill and staffing needs to meet rigorous project timelines. Our delivery method, governance, and oversight approach mitigates customer risk, while ensuring ace consulting services.

Technical Solutions

We leverage NetSuite's Suitecloud technology toolkit to deliver cogent NetSuite solutions.

Our technical competencies also focus on utilizing Suite Script to extend NetSuite beyond the capabilities provided through Suite Builder point-and-click customizations.

- **SuiteBuilder** point-and-click tools to enable users to customize NetSuite by adding custom fields, lists, record types, and forms.
- **SuiteScript**, an extension of the JavaScript APIs, to extend NetSuite in order to automate business processes or to build applications on top.
- **Managed Support** such as automating custom approval routing, applying validations, sending emails, creating related records, directing the end user to appropriate forms in the user interface, etc.
- **SuiteBundler** to rapidly deploy vertical solutions to multiple NetSuite accounts.
- **Integration using SuiteTalk** to expose NetSuite as a web service to simplify integration with legacy systems and third party vertical applications. SuiteTalk relies on industry standards (SOAP and XML) for data communication with external hosts.
