Oracle Discoverer to OBIEE Migration

ORACLE®
BUSINESS INTELLIGENCE

Features and Benefits

- Reduced development time and cost
- Control quality leakage
- Leverage existing reports to avoid re-requirement process
- Technical migration followed by SDLC Project Life Cycle
- More calculable innovation on presentation layers
- Diminished supply chain disruption
- High-caliber drill-down mechanism

Elements Migrated

- Reports
- Infrastructure
- Folders
- Calculations
- Filters
- Conditions
- Joins
- Hierarchies
- Business Rules

Automated Phases

- Identification (workbooks, folders, classes, hierarchies)
- Preparation of Data Sets
- Migration

Automated Migration from Discoverer to OBIEE

You've already invested time and money in Oracle Discoverer and now want to move forward into the new world of OBIEE Plus without having to scrap the wealth of intelligence built in Oracle Discoverer. We can help.

ennVee offers a complete service to migrate your existing Oracle Discoverer reports to OBIEE Plus. Using ennVee's methodology and the new Oracle Discoverer Metadata Conversion Assistant we can quickly migrate your Discoverer reports to OBIEE Plus. Our deep knowledge in both business and technologies (Discoverer and OBIEE) will help accelerate the migration process.

Our migration accelerator enables users to create BI reports effortlessly, generating all required details by accepting multiple data sources, while providing increased flexibility and affordable pricing. 100% of reports and filters from Discoverer (Desktop) are migrated into OBIEE without requiring a rebuild or losing any data. The workbook migration process is 100% automated. Rather than rebuild, all reports and their existing features are migrated. Additionally, you can automatically extract user access information for the reports and provides the same for sharing reports manually between users. The conversion process is highlighted below:

Apply Best Practices

Analyze & Prioritize → Convert (Metadata Conversion) → Optimize → Secure → Accept

Apply Security Model

Iterative Review

Migration Pre-Requisites

A development instance with access to:

1. Apps access and EUL Access (Schema name varies based on the Discoverer installation/administrator)
2. Discoverer Desktop/Discoverer Plus access to obtain the front-end report information on the fields to be displayed
3. Oracle Database access to run the extracted queries
4. Target system (OBIEE) access
