

Oracle Fusion Cloud Applications

We've worked extensively with Oracle's Fusion Applications since its 2010 inception. As a SI in Oracle's Early Adopter program, ennVee was the first SI to bring the Fusion Financials suite live for any Oracle customer anywhere in the world.

Hybrid Fusion Solutions

Fusion ERP, HCM and CRM can be deployed using either a SaaS, hosted, or on premise model. We can also deploy it as a hybrid approach where a component of Fusion applications co-exists with core EBS, HCM, or CRM.

APPLICATIONS STRATEGY ASSESSMENT

We generate a fusion roadmap and business case that aligns to your organization's technology and business agents.

FUSION IMPLEMENTATION

Our fusion applications portfolio ensures expeditious implementation of Oracle Fusion HCM, Project Portfolio Management, Procurement, CRM and Oracle Fusion Financials.

FUSION SUPPORT

Our accomplished team of consultants affords a gamut of industry-leading experience that extends to financial, human capital management, supply chain management, portfolio management and customer relationship management.

DIFFERENTIATORS

We have been implementing SaaS products since 2010 and have used that experience to tune our Fusion implementation methodology for Cloud services. In recognition of our expertise in Fusion Applications and Cloud-based system implementations, ennVee was by Oracle to provide guidance to their sales staff in preparation for the launch of Fusion ERP Cloud Services.

SAAS OFFERING
