Oracle Fusion HCM's user-centric design provides value to every individual across the organization — from HR Professionals, to employees and managers. Whether you opt for a single module or the entire suite, ennVee can help foster HCM coexistence with your current applications to deliver innovation without disruption.

Oracle HCM Practice

ennVee's HCM practice is built on the fact that traditional HR tasks are unique to each organization. We adopt specific modules from Oracle Fusion HCM and harmonize them with your current installation: Oracle E-Business Suite, PeopleSoft, or JD Edwards.

Oracle Fusion Human Capital Management goes beyond traditional HR tasks with strategies that balance people, process and technology to improve workforce efficiency, effectiveness, and productivity. Built from the ground-up for the Cloud or On Premise, on the device of choice, and to provide simple self-service capabilities that give users relevant, secure content to information they need. Global processes, interactive organizational charts, collaborative tools, predictive analytics, and productive self-service are natively delivered out-of-box to enable rapid deployment of critical HR functionalities.

Our Recommendation

Oracle Fusion HCM provides several integration methods to meet your business needs, from packaged integrations to delivered interfaces for Payroll and Benefits providers, to an integration platform based on Oracle Fusion Middleware and a comprehensive set of tools, templates, and pre-packaged integration to cover various scenarios using modern and efficient technologies. This allows integration to any current HCM installation.

Oracle implementation combines the breadth and depth of end-to-end solutions covering core HR, workforce management, workforce rewards, as well as workforce optimization, and workforce analytics with ease and speed of cloud delivery. Having the visibility to identify potential problems before they occur and take immediate action will increase morale, save money, and boost your competitive edge.
