

Oracle Infrastructure-as-a-Service (IaaS)

Flexible, Hybrid Hosting for Critical Oracle Workloads

ennVee's dedicated or private Infrastructure-as-a-Service Cloud

We are committed to making your transition to Cloud as seamless as possible. Our IaaS cloud offerings are designed for maximum flexibility, and to enable you to run any and all of your Oracle and non-Oracle workloads in the Cloud with ease.

If your organization is not interested in moving everything at once, we provide the flexibility to host and deploy any number of your projects or applications at any given time. We can help you during any state to create the best possible architecture and strategic road map to Cloud. Our IaaS offering is meant to be elastic and transparent to deliver a secure method for transitioning your organization to the Cloud.

Our Expertise

- SOA, OBIEE monitoring system running on IaaS
- Oracle EBS Dev environment (12.2.5) sitting on Oracle Management Cloud
- Hosting Oracle EBS systems on Oracle Management Cloud
- Managed Support
- Development: all work is performed in our Cloud environment and ported into customer systems
 - A ready-to-go environment where all work can be performed. Everything is run on Oracle Enterprise Cloud
- Hosting cloud based monitoring systems and managing all customer monitoring data sitting in the cloud or in-house
- Manage systems on cloud (we have network admins, database engineers, cloud engineers, who host and manage systems on Oracle IAAS Cloud)
- Re-engineering of legacy systems to client or server systems
- Web-enabling of legacy software

Our Offering

- Disaster Recovery Cloud management
- Private Cloud deployment
- Cloud Implementation
- Consulting
- Network setup & configuration
- Cloud Managed Services
- Cloud-based monitoring (OBIEE, SOA, EBS)
- Hosting & Deployment for Oracle E-Business Suite Applications
- Remote Support
- Elastic Computing Services
- Storage Cloud Services
