

Oracle PeopleSoft Application Management and Support

Business requirements are complex, but your applications shouldn't be

ennVee's Oracle PeopleSoft application support services free your organization to focus on more important initiatives. Whether you want tighter control of operational costs or to reach performance goals that help sustain long-term growth, having an application support partner that understands your business can make the difference.

Application Support

ennVee support services help to optimize the performance and extend the longevity of your PeopleSoft applications. We provide three levels of application support from a hybrid team of on-site and/or off-shore consulting resources. Combined with our extensive support experience, and breadth of PeopleSoft applications expertise, we deliver enduring value through proactive application management, service delivery automation, and by becoming a true extension to the customer's IT team.

PeopleSoft Implementation

Over the last 30 years, we have helped clients conquer Oracle and PeopleSoft ERP implementation challenges. We collaborate with our clients during all phases of the implementation; from project planning to requirements definition, data conversions, to end-user training and all aspects in between. Our project and risk management expertise focuses on an assurance-based PeopleSoft deployment approach.

PeopleSoft Consulting Teams

Our functional and technical PeopleSoft consultants have developed comprehensive methodologies for implementation and production support, refined through many years of experience with large global customers. ennVee's PeopleSoft Competency center is armed with secure infrastructure and simulated PeopleSoft application environments to ensure consistency.
