

Oracle SOA, Identity Management, and Access Management

Our Offering

SOA Expertise

- Architecture, Design, and Implementation
- SOA maturity and adoption assessment
- Installation, Configuration, and On-going Administration
- BPEL Business process automation and workflow optimization
- Applications and Systems integration at service and data layers

Technologies

- SOA Suite 10g, 11g, 12c
- Oracle Service Bus (OSB)
- Business Process Management (BPM)
- Business Intelligence
- WebCenter
- ADF
- Identity Management Suite

Business Benefits

- Adaptable business processes that provide agile SOA solutions to help you adjust to changing market conditions.
- Superior ownership experience by lowering total cost of ownership, reducing implementation time and cost, simplifying upgrades, and minimizing downtime.
- Enterprise-wide, real-time business intelligence for improved decision-making.

ennVee SOA Practice

In a fast-paced, highly-competitive business environment, your organization needs to remain productive, while being able to extend existing business processes, or creating new ones. The challenge is to do more with less, and cost-effectively. To do so, you require solutions that can deliver both predictability and responsiveness which are imperative for your growth. ennVee offers you Oracle Fusion Middleware-based solutions to enable you to extend your business processes, evolve, keep connected, while remaining agile.

Today, organizations are looking for quick, flexible, secure, and cost-effective applications for their IT systems. Complete overhauls to customers' applications are expensive, as well as disruptive to business. Transitions are traumatic for employees, and often result in IT inertia and customer alienation. We extend business processes by aligning enterprise IT architecture with your business objectives to create optimum and agile business processes. Using Oracle Fusion, we help you leverage more effectively your existing investment in Oracle to pursue or refine your current Fusion Architecture. Our goal is to provide greater reliability, stability, and reduce manual activity.

Blue Chip Consulting Teams

ennVee consultants have been working with the Oracle SOA Suite since its earliest release back in 2004. Our team's involvement in numerous SOA implementations means we bring first-class best practice to the design, development and implementation of Oracle SOA Suite.

Our architects and consultants have a wealth of experience in Service-Oriented Architecture and participate in several forums that help shape the adoption of these technologies within the SOA world. Utilizing both hands-on experience and industry best practices, ennVee provides exceptional guidance in assessing any SOA solution, whether it is already implemented or still in the planning phases.

ennVee's consultants are well-qualified in Oracle Application Integration Architecture (AIA). Their rich expertise spans across multiple SOA products, like BAM, BPEL, OSB, ESB, BPM, ODI, ADF, OAF, WCP, and AIA. We employ a hybrid delivery model that utilizes a blend of on-site and off-shore resources, and can effectively deliver your integration projects on time and under budget. Application Integration is our niche, meaning we can effectively execute across multiple continents and time zones.

Identity & Access Management

Our OAM services enable bulletproof security for applications, data, and web services. We provide end-to-end authentication and single sign-on services that deliver fine grained application protection. Our innovative anomaly detection transaction security provides optimal:

- Authentication
- Single Sign-On
- Federation
- Fraud Prevention
- Authorization and Entitlements
- Web Services Security
- Secure Token Services

Implementation

Our implementation services are meant to be flexible and based on your business preferences. We can deliver rapid Oracle IDM implementations on-site or offshore. Organizations protect their data and maintain longevity.

- Oracle Access Management (OAM)
- Oracle Identity Manager (OIM)
- Oracle Internet Directory (OID)
- Oracle Virtual Directory (OVD)
- Oracle Unified Directory (OUD)
- Oracle Identity Federation (OIF)
- Oracle Adaptive Access Manager (OAAM)
- Oracle Identity Analytics (OIA)
- Oracle Entitlements Server (OES)

IDM Integration

- Integration with any LDAP (AD, SUN, etc.)
- OAM with OBIEE
- OAM with EBS (R12, 11i)
- Integration with Fusion Middleware products

OAM Integration

- Oracle EBS - R11i, R12.1.X, R12.2.X
- Oracle Fusion Applications
- Oracle Fusion Middleware (OBIEE, SOA, Hyperion, Demantra)
- Integration with third party and custom applications
