

Oracle Supply Chain Management

Fortune 500 to SMBE's, size does not dictate the importance of improving operation performance, while maintaining a competitive advantage in price and service. Having a supply chain that integrates seamlessly with front and back office operations is imperative, and is a factor that can make or break your profitability. We help you leverage Oracle's Supply Chain technologies to lay the groundwork for long term growth and stability.

ennVee understands the pressures placed on organizations today to remain competitive in a global marketplace. We can help you leverage your Oracle E-Business Suite investment to support your supply chain initiatives. We offer flexible implementation options including dedicated project management, consistent application of proven implementation methodologies, organizational change management, and user training over and above our range of business and technology services.
