

Salesforce Integration Adapter for Oracle E-Business Suite

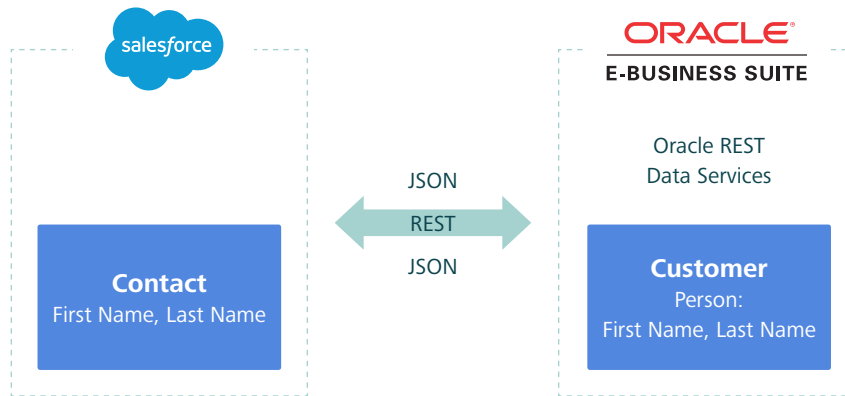

Real-time, field-level information, readily available & integrated

Using open source technologies and leveraging pre-invested business platforms, we provide a unique information integration tool between your front-end SFDC CRM tool and back office Oracle EBS ERP system for your Sales team to provide accurate order information to your clients.

Information at the right place and time

Sales teams know and understand the challenges of acquiring new customers. Over the course of the past decade, competition has become more rigid and differentiation in products and services less transparent. The answer lies in delighting existing clients through superior service and up-to-date information. Your client has trusted you with his order so that they can fulfill their promise to his customer. Having the right information at your fingertips will ultimately help you help them fulfill their promise.

SFDC to Oracle E-Business Suite Adapter

Our adapter crafts a transparent integration with your Oracle E-Business Suite system.

Step Up to Better Business

Acquire client mind-share, generate higher wallet-share. This is possible only if the sales person devotes more time meeting in-person with the customer or prospect, rather than manually generating or searching for the right CRM data. ennVee's SFDC adapter to Oracle bridges the gap and provides real-time information about orders placed on you by your customers.
